Professional Summary

Full-Stack Web & Mobile Developer specializing in Java Spring Boot, Angular, and Flutter. Experienced in designing robust application architectures (Hexagonal, Modulith) and delivering end-to-end critical features within software engineering consulting firms.

Work Experience

Yandoama Consulting, Full-Stack Consultant

Sept 2026 – present

- Serve as a full-stack consultant on high-availability client projects within a software engineering services firm.
- Design and deploy transactional REST APIs with Java Spring Boot, integrated with modular Angular 17+ frontends.
- Architect maintainable software solutions (Hexagonal, Event-Driven) reducing technical debt and enabling seamless business logic updates.

Yandoama Consulting, Full-Stack Software Developer Intern

May 2026 – Aug 2026

- Designed and delivered an event access control mobile app using Flutter, secured by Keycloak (<1s QR code scanning verification).
- Developed Spring Boot modules integrated with an Angular dashboard featuring real-time notification channels.
- Configured PostgreSQL, Liquibase for database migrations, and integrated Redis Streams for asynchronous event handling.
- Applied Scrum agile methodologies strictly (2-week sprints, daily standups, sprint reviews, and demos).

IBAM - Academic Project, Full-Stack Developer (Final Year Capstone Project)

Apr 2026 – May 2026

- Designed and implemented an academic document repository platform with semantic search and plagiarism detection.
- Developed a FastAPI backend leveraging PostgreSQL, PGVector, and SentenceTransformers for vector similarity calculations.
- Built a dynamic, responsive Angular frontend secured with multi-role JWT authentication.

Personal Project, Mobile Application Developer

Sept 2025 – Feb 2026

- Independently designed, developed, and deployed a Flutter mobile app for nutrition tracking and food analysis.
- Integrated the Gemini multimodal API for visual meal recognition and implemented Hive for offline local persistence.

IBAM Computer Club, Full-Stack Developer

June 2026 – June 2026

- Developed and deployed a secure cloud storage mobile app along with an Angular back-office dashboard.
- Integrated Supabase for user authentication, file storage, and Row Level Security (RLS) policies.

Skills

Languages & Frameworks: Java (Spring Boot, Spring Modulith), TypeScript (Angular), Dart (Flutter), Python (FastAPI, Django), PHP (Laravel).

Architecture & Quality: Microservices, Hexagonal Architecture, Event-Driven Architecture, Clean Code, RESTful APIs, CI/CD, Automated Testing.

Databases & Middleware: PostgreSQL, PGVector, Redis (Streams, Caching), MariaDB, MongoDB, Liquibase, Keycloak, Supabase, Firebase.

DevOps & Tools: Docker, Docker Compose, GitHub Actions, GitLab CI, Linux (Manjaro, Debian), Bash, Zabbix 7.

Education

IBAM - Joseph Ki-Zerbo University – Ouagadougou, Burkina Faso

Oct 2023 – June 2026

Bachelor of Science in Information Systems & Business Informatics (MIAGE)

Lycée Provincial Bassy – Ziniaré, Burkina Faso

Sept 2020 – June 2023

High School Diploma (Baccalaureate Series C - Mathematics & Physical Sciences)

Leadership & Responsibilities

IBAM Computer Club, Head of External Relations

Nov 2024 – Nov 2025

- Established corporate tech partnerships and represented the student association at inter-university summits.

IBAM Computer Club, Co-Organizer - ComeToCode Hackathon

June 2025 – June 2025

- Coordinated event logistics, managed jury panel communications, and mentored 50+ participants over a 48-hour period.

Certifications

Bash Scripting & Shell Automation: The Linux Architect Guide

- Udemy – May 2026

Spring Boot REST API with Java and Gradle

- CodeSignal – 2026
